ARCHITECTS AND ENGINEERS SPECIFICATIONS

MODELS "WP" SERIES

The wall plates shall be **AEG Models, as listed above**. The units shall be constructed from 0.030" brushed stainless steel. Other materials are available upon request. The mounting centers shall be 8.3cm (3 9/32"), using countersunk 6-32" oval head screws (provided). Custom configurations other than the above are available. These wall plates are possible up to 10 gang length. Special hole punching is a feature which adds to your flexibility. For surface mounting applications the above units will mount to **AEG Models SM25, SM35, and SM45** wall boxes for the single gang plates (see technical notes on SM Series for more details), and **SM352 and SM452** for double gang plates. Custom surface mount boxes are obtainable, please submit drawings for evaluation. These plates shall be used wherever single or multiple gang stainless steel or other material wall covers, including a variety of lengths and hole patterns are required. Specify **AEG "WP"** series for all your projects.
